

What's New with PCPI

Based on your comments and identified needs, a couple of changes have been made within the Provider Claims Processing application. Some unneeded items have been removed and some amenities have been added. Number one on our list of needs was increased speed. We're still working on finalizing that one and hope to have more increases.

Below is a summary of other changes/enhancements:

1. The "Agency/Serv.Provider" column from the list of recipients and services has been removed and replaced with an addition indicator. If this box is checked, it shows the service is an addition that has been added by the service agency.
2. A calendar **total** now shows after **submit** has been pressed.
3. The **Site number** has been added to the Monthly Summary.
4. A **Grand Total** has been added to the Monthly Summary.
5. A **Logout** button has been added to the menu.
6. Only services with **hourly units** may enter partial units.
7. **Ancillary services** that must be billed through the regional office will not show in this system.
8. Upon initial login, you maybe prompted to change your **password**.
